

Report Types

CPS uses student performance data to provide you with 24 different types of reports. Reports fall into three major categories: Class Reports, Individual Reports, and Export Reports.

Class Reports

Class reports give general information about the overall class performance. While these reports may also give some information on each individual student, the overall focus of the report is on the class. Class reports include:

1. **Instructor Summary Report:** The Instructor Summary lists the number of correct to attempted answers and the percentage of correctly answered questions for all students selected in the report. (*Note:* Scores are calculated using the first answer inputted for sessions delivered using the Student Practice mode.)

10	Damon, Matt	1020	3 of 4	75% (4)	75.0
11	Diaz, Cameron	1003	4 of 4	100% (4)	100.0

2. **Question Report:** The Question Report shows the answer distribution per question, listing each question and answer option, a pointing finger indicating the correct answer, the name of every respondent, the answer selected by each respondent, the percentile of respondents per answer option, and a bar graph showing answer distribution. (*Note:* Report indicates the number of attempts made to get the answer correct for sessions delivered using the Student Practice mode.)

- Response Report:** The Response Report shows only the percentage of students who selected each answer choice with a pointing finger indicating the correct answer. This report presents data in an anonymous format, so that you can evaluate the overall class performance without looking at the individual performance. (*Note:* This report is unavailable for sessions delivered using the Student Practice mode.)

6. **Standards Analysis Report:** The Standards Analysis Report is only available if the questions delivered in the delivery session had standards associated with them. If that is the case, this report displays each standard code, the actual standard, and the percentage of students who correctly answered the question(s) associated with the standard. This percentage does not take into account any questions in the lesson that were not associated with standards. (*Note:* Scores are calculated using the first answer inputted for sessions delivered using the Student Practice mode.)

- Data Slicing Report:** The Data Slicing Report opens up the Charting window with a chart of the last question of the assessment. See CPS user's guide for in-depth explanation of how to do data slicing. (*Note:* This report is unavailable for sessions delivered using the Student Practice mode.)

Individual Reports

Individual reports focus on the performance data for each student. Individual reports include:

- Study Guide Report:** Provides a detailed study guide for each student showing the number of correctly answered questions, percentage of correctly answered questions, each question, answer choice, and student answer. This report is ideal to give students for review. (*Note:* Report indicates the number of attempts made to get the answer correct for sessions delivered using the Student Practice mode.)

Student Practice Mode

- Study Guide – Incorrect Answers Report:** This report provides the student with all of the same information as the Study Guide, but excludes questions that the student answered correctly. (*Note:* Report indicates the number of attempts made to get the answer correct for sessions delivered using the Student Practice mode.)

Export Reports

Export reports are reports that you can export to third-party software applications or are automatically opened in Microsoft Excel. Export reports include:

1. **Question Grid Export Report:** CPS displays the Question Grid report in spreadsheet format using Microsoft Excel or your system's default spreadsheet application. When you select the Question Grid report, a Save As window opens asking where you want to save the report in .csv file format. When you select the file location, the Question Grid opens in Excel or some other default spreadsheet application.

The Question Grid report lists each student in the class who was a part of the delivery session. The number of each question delivered in this session appears along the top of the report, creating a grid between the student names and question number. Below each question number, the letter that represents the correct answer appears.

If a student answered a question correctly, a plus sign is in line with their name under that question number. If a student answered incorrectly, the letter that represents their answer is in line with their name under that question number.

Also, this report lists the total number of correctly answered questions by all students in the class, as well as the percentage of correct answers.

(Note: Report indicates the number of attempts made to get the answer correct for sessions delivered using the Student Practice mode.)

2. **Session Data Export Report:** CPS presents the Session Data Export report in .csv format. When you select Session Data Export, a Save As window opens asking where you want to save the report. When you select the file location, the Session Data Export report opens in Excel.

While you can export previous reports to .csv file format and use the data in other software applications, CPS formats the Session Data Export report especially for immediate import to another program. The report contains only the performance data, and no text about the session.

The Session Data Export Report column headings (from left to right) are: Last name, First name, Student ID, Number of correctly answered questions, Total number of questions, Percentage of correctly answered questions, and Total percentage available.

(*Note:* Scores are calculated using the first answer inputted for sessions delivered using the Student Practice mode.)

3. **Classroom Manager Export Report:** CPS presents the Classroom Manager Export report in .txt format. When you select Classroom Manager Export, a Save As window opens asking where you want to save the report. When you select the file location, the Classroom Manager Export report opens in Notepad.

The Classroom Manager Export report shows the student names and each answer from their response pads represented in a zero-based array format. In the representation of responses, 0=A/T/Y, 1=B/F/N, 2=C, 3=D and 4=E. (*Note:* This report is unavailable for sessions delivered using the Student Practice mode.)

4. **AEIS-IT Export Report:** CPS presents the AEIS-IT Export report in .txt format. When you select AEIS-IT Export, the following data dialog window opens. Enter the required information and click OK.

A Save As window opens asking where you want to save the report. When you select the file location, the AEIS-IT Export report opens in Notepad. (*Note:* This report is unavailable for sessions delivered using the Student Practice mode.)

5. **OnTrack Export Report:** CPS displays the Ontrack Export report in spreadsheet format using Microsoft Excel, or your system's default spreadsheet application. When you select the Ontrack Export report, a Save As window opens asking where you want to save the report in .csv file format. When you select the file location, the Ontrack Export opens in Excel or some other default spreadsheet application.

Ontrack exporting is a third party information system for corporate training organizations. This tool is used to track training participants and their performance on training assessments. We support an import of students from ontrack, and an export of their performance data to ontrack. (*Note:* Scores are calculated using the first answer inputted for sessions delivered using the Student Practice mode.)

- Response Data Export Report:** CPS displays the Response Data Export report in spreadsheet format using Microsoft Excel, or your system's default spreadsheet application. When you select the Response Data Export report, a Save As window opens asking where you want to save the report in .csv file format. When you select the file location, the Response Data Export opens in Excel or some other default spreadsheet application.

The Response Data Export report lists each student in the class who was a part of the delivery session. The number of each question delivered in this session appears along the top of the report, creating a grid between the student names and question number. Below each question number, the number that represents the correct answer appears.

Also, this report lists the total number of correctly answered questions by each student in the class, as well as the percentage of correct answers. (*Note:* Report indicates the number of attempts made to get the answer correct for sessions delivered using the Student Practice mode.)

- Post Report:** CPS displays the Post Report in spreadsheet format using Microsoft Excel, or your system's default spreadsheet application. This .csv file will be stored wherever your database is saved. The Post Report is designed to allow the instructor to choose what information is included in the report.

This report is very useful when posting grades and wanting to keep the students' scores anonymous. By clicking the options in the display information box, you can design your report to reflect only the information you desire to be shown. The Post Report exports: Student last name, Student first name, Number of points student received for the assessment, and Percentage correct. (*Note:* Scores are calculated using the first answer inputted for sessions delivered using the Student Practice mode.)
